BACKEND SKILLS

Core Java

- Strong understanding of Object-Oriented Programming (OOP) concepts including Encapsulation, Inheritance, Polymorphism, and Abstraction.
- Good knowledge of core Java fundamentals including classes, objects, interfaces, abstract classes, method overriding/overloading, and file handling.

JDBC

- Proficient in using JDBC (Java Database Connectivity) to establish and manage connections with relational databases.
- Experienced in performing CRUD operations using Statement, PreparedStatement, and CallableStatement.

Hibernate

- Developed the persistence layer using Hibernate ORM by implementing entity mapping, session management, and CRUD operations for efficient interaction with the MySQL database.
- Configured Hibernate using XML/annotations and worked with Hibernate Session and Transaction APIs to manage entity relationships for reliable data persistence.

SQL

- Proficient in writing and optimizing SQL queries for data retrieval and manipulation using SELECT, INSERT, UPDATE, and DELETE statements.
- Strong understanding of database concepts including joins, subqueries, constraints, normalization, and relationships between tables.

Spring & Spring Boot

- Built REST APIs and backend services using Spring and Spring Boot, connecting them with MySQL for full-stack applications.

FRONTEND SKILLS

HTML, CSS & Bootstrap

- Built responsive, mobile-friendly web pages using HTML5, CSS3, and Bootstrap.

JavaScript

- Implemented DOM manipulation and event handling to create interactive user interfaces.

React.js

- Built UI components with React.js and connected them to backend REST APIs to fetch and display dynamic data.

TOOLS AND PLATFORMS

Git & GitHub - Maintained project repositories and managed source code.

VS Code & Eclipse - Primary IDEs for Java and full-stack development.

Postman - Tested and debugged REST APIs during development.

EDUCATION & CERTIFICATION

Bachelor of Technology - Information Technology

2022 - 2026

SSM College of Engineering | Anna University | Komarapalayam

CGPA: 7.5/10

CERTIFICATION

- Java Full Stack Development
- SQL
- Java
- Spring Boot
- React.js
- JavaScript

INTERNSHIP

Java Full Stack Developer Internship | JSpider, Bangalore

26 April 2026 – Present

- Pursuing industry-oriented training in Java Full Stack Development with hands-on exposure to Core Java, SQL, JDBC, Hibernate, Spring Boot, and Web Technologies.
- Developing and improving Java-based applications using Core Java concepts and object-oriented programming principles.
- Utilizing JDBC and MySQL to perform database connectivity and CRUD operations.
- Applying OOP concepts such as Inheritance, Polymorphism, Abstraction, and Encapsulation in real-world use cases.

Full Stack Web Development Intern | Greap Technologies

10 July 2025 – 10 August 2025

- Completed a 4-week internship under the Full Stack Web Development Fast Track Program, with daily live training sessions followed by hands-on assignments and project work.
- Guided by a Senior Full Stack Developer, gaining practical experience in end-to-end web application development.

PROJECTS

CampusIQ – Student Management System

- Full-stack student management system designed to manage student records, attendance, marks, and fee details through a centralized web application.
- Developed the frontend using React.js and Bootstrap, with a responsive interface for Admin and Student users.
- Built and integrated Spring Boot REST APIs to handle student management, attendance, marks, and fee-related operations.
- Implemented seamless data flow between the React.js frontend, Spring Boot backend, and database using Fetch/Axios.
- Designed separate Admin and Student dashboards with role-based access and dynamic data management.

Tech stack: React.js, Bootstrap, Java, Spring Boot, REST API, Fetch/Axios

Domain: Student Management, Academic Records, Attendance & Fee Management, Web Application Development

E-Commerce Shopping Website

- Responsive online shopping website with product browsing, search, and cart functionality.
- Built the frontend using HTML, CSS, JavaScript, and React for a smooth, interactive user experience.
- Focused on clean UI/UX and consistent navigation across devices.

Tech stack: HTML, CSS, JavaScript, React

Domain: E-Commerce, Frontend Development

AI-Based Interview Preparation Platform (Final-Year Team Project)

- Platform that helps students and job seekers practice interviews by generating AI-based questions tailored to job role, interview type, and difficulty level.
- Built the frontend using Next.js and Tailwind CSS, with a Node.js, Express.js, and Mongoose backend on MongoDB.
- Implemented modules for user authentication, interview setup, question generation, and AI-based answer evaluation covering grammar, confidence, and relevance.
- Deployed on AWS EC2, using Postman for API testing and Docker for containerization.

Tech stack: Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, AWS EC2, Docker

Domain: Artificial Intelligence, Career Tech, Interview Preparation

HOBBIES

- Learning New Technologies
- Building Personal Projects
- Listening to Music
- Playing Chess
- Exploring Open-Source Projects
